1. Read the text and choose the best option.

The hippo is one of the largest mammals on Earth. Male hippos weigh 1500 to 2000 kilograms, and females weigh 1300 to 1800 kilograms. Zambia and Tanzania in Africa have the largest populations of hippos. Most people think that hippos eat meat because they're so large. However, hippos are herbivores, and they eat short grasses and fruit. They live in the slow-moving rivers and lakes of Africa. Hippos can hear, see, and breathe while most of their body is underwater.

According to the text above, which of the following is NOT correct?

- A) Most people think hippos are carnivores, but they are not.
- B) Female hippos weigh more than 2 tons.
- C) They mostly live in rivers and lakes of Zambia and Tanzania.
- D) Hippos are one of the enormous animals on land.

2. Read the text and choose the best option.

Chameleons are reptiles, and they mostly live in the rainforests and deserts in Africa. They have the ability to change their color. They have long and sticky tongues. Chameleons generally eat insects. Some larger chameleons also eat small birds and other lizards. They are not harmful to humans. They spend most of their time up in the trees.
